

[Notice] Revision of FSC Scheme due to Middle East Conflict

Dear Valued Customers,

First, we would like to express our sincere gratitude for your continued loyalty and support.

Due to the escalating conflict in the Middle East, our current operational costs are under significant pressure due to surging oil prices.

In order to ensure our service quality in this fluctuating market, we are announcing an urgent adjustment of Fuel Surcharge effective 1 April 2026, which will be detailed on our Korean Air Cargo homepage.

Furthermore, to better reflect market volatility, we will transition from the current quarterly updates in some regions to a monthly FSC announcement for all shipments, effective the same date.

We recognize this change may be a burden. However, these measures are vital for navigating these turbulent times together and maintaining the resilience of our global networks.

We truly appreciate your patience and strong partnership during this transition.

Sincerely,
Korean Air Cargo
